

Star & Cross Zellige - Teal

Architect Specification Pack

1. Product summary

This pack documents a handmade Moroccan zellige product supplied on a quote-before-order basis. No inventory is held: manufacturing and export are supplier-fulfilled through independent artisan workshops in Morocco.

Product	Star & Cross Zellige - Teal
Supplier SKU	Pending verification
Unit	Pending verification
Sourcing	Sourced through independent Moroccan artisan workshops

Thickness	Pending verification
Finish	Pending verification
Edge	Pending verification
Application	Pending verification
Unit	Pending verification
Image licence	Pending verification

MOQ and lead time are shown only when supplier-verified; where absent they are confirmed per project in the written quotation.

3. Description

Our Color Reference: ZELLIGE-COL-0018 - internal Zellige Atelier color code, not a supplier number or a verified physical swatch. Teal interlocking star and cross ceramic pieces · Custom sourcing idea. Editorial moodboard photo, not confirmed stock or sample.

4. Material variation & tolerance

Zellige is hand-cut and hand-glazed earthenware. Variation in colour, size, edge and surface is intrinsic to the material and part of its character, not a defect.

Samples are references, not contracts: they illustrate typical colour, format and finish, and an exact match cannot be guaranteed between a sample and a production batch.

Do not treat a single sample as a binding colour or size target; agree acceptable tolerances in writing before manufacture.

5. Ordering & sampling

Orders are quote-based. There is no online checkout and no stock: production begins only after a written quotation is accepted.

A sample-first process is recommended. Approve colour, format and finish on a physical sample before bulk manufacture.

Pricing, MOQ and lead time are confirmed in writing for the specific project.

6. Installation note

This guide is general information, not a substitute for a qualified tiler's assessment. Substrate preparation, waterproofing and movement joints must comply with local building codes and the tile manufacturer's written instructions.

7. Import & customs note

Customs classification, duties, tariffs and import requirements change frequently and vary by destination. Confirm current rules with a licensed customs broker before shipping.

8. Price

Price: on request (quote-based)

Prepared for specification purposes. Details are indicative only and do not constitute an offer.
