Edge	Pending verification
Application	Pending verification
Unit	Pending verification
Image licence	Pending verification

MOQ and lead time are shown only when supplier-verified; where absent they are confirmed per project in the written quotation.

3. Description

Our Color Reference: ZELLIGE-COL-0011 - internal Zellige Atelier color code, not a supplier number or a verified physical swatch.Custom sourcing option in Burgundy. Photo: general design moodboard, not the precise offered tile or confirmed stock.

4. Material variation & tolerance

Zellige is hand-cut and hand-glazed earthenware. Variation in colour, size, edge and surface is intrinsic to the material and part of its character, not a defect.

Samples are references, not contracts: they illustrate typical colour, format and finish, and an exact match cannot be guaranteed between a sample and a production batch.

Do not treat a single sample as a binding colour or size target; agree acceptable tolerances in writing before manufacture.

5. Ordering & sampling

Orders are quote-based. There is no online checkout and no stock: production begins only after a written quotation is accepted.

A sample-first process is recommended. Approve colour, format and finish on a physical sample before bulk manufacture.

Pricing, MOQ and lead time are confirmed in writing for the specific project.

6. Installation note

This guide is general information, not a substitute for a qualified tiler's assessment. Substrate preparation, waterproofing and movement joints must comply with local building codes and the tile manufacturer's written instructions.

7. Import & customs note

Customs classification, duties, tariffs and import requirements change frequently and vary by destination. Confirm current rules with a licensed customs broker before shipping.

8. Price

Price: on request (quote-based)

Prepared for specification purposes. Details are indicative only and do not constitute an offer.
